Engineering
Human Computer Interaction (HCI)

Lecture: François Bérard and Gaëlle Calvary
Project : Gaëlle Calvary
(prenom.nom@grenoble-inp.fr)

In our daily lives

So many questionnable computer systems … every where

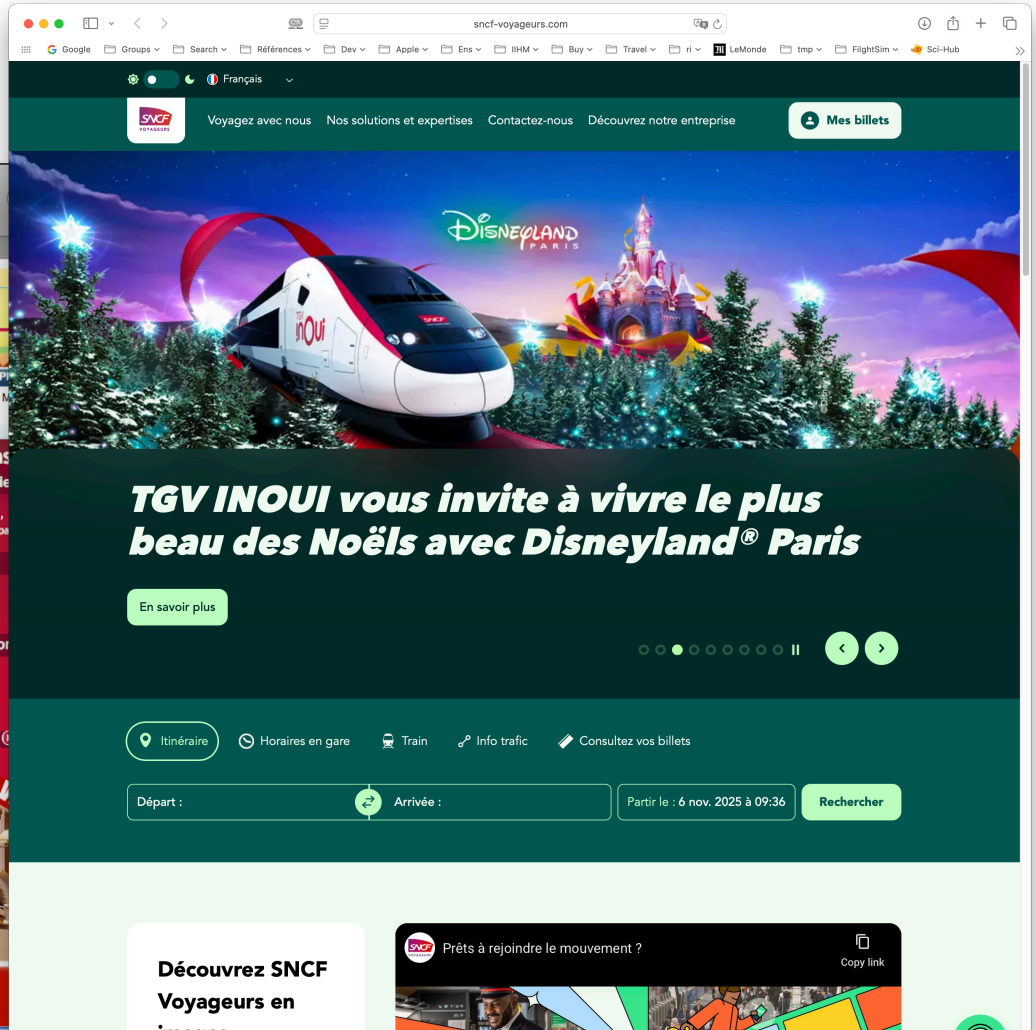

SNCF 2010

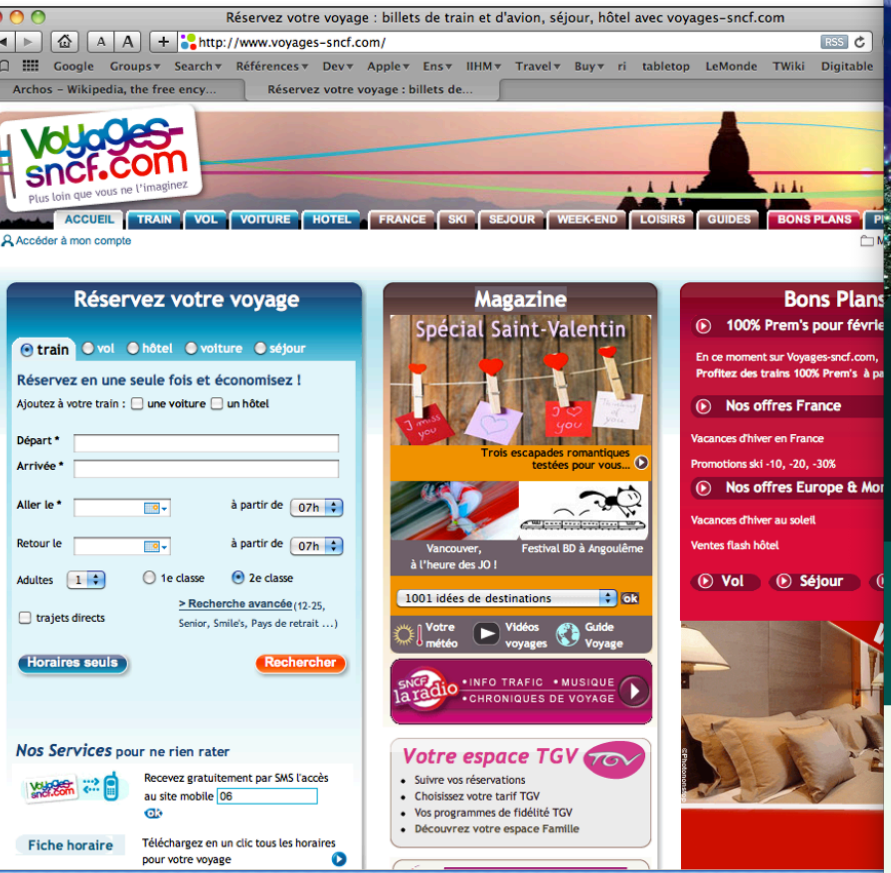

In our daily lives

So many questionnable computer systems … every where

SNCF 2025

SNCF 2010

Challenges

- Understanding the target users: knowledge, abilities, needs.

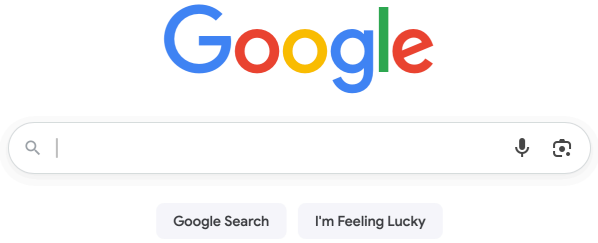

Challenges

- Understanding the target users: knowledge, abilities, needs.

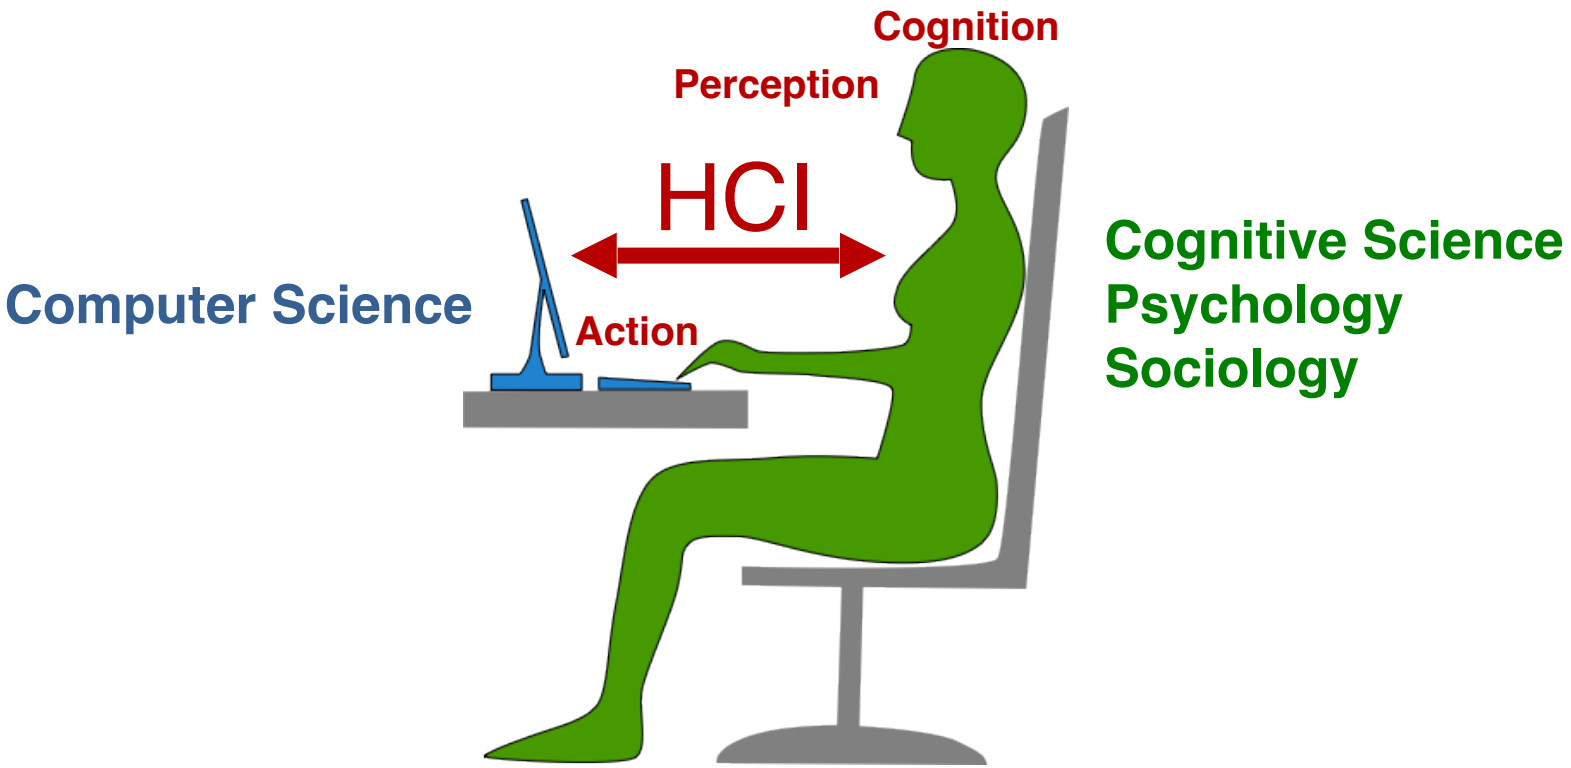

- Designing the right HCI: useful, usable

Human Computer Interaction (HCI)

A scientific domain at the cross-road of several disciplines

Challenge in designing the HCI

Making it useful and usable is difficult

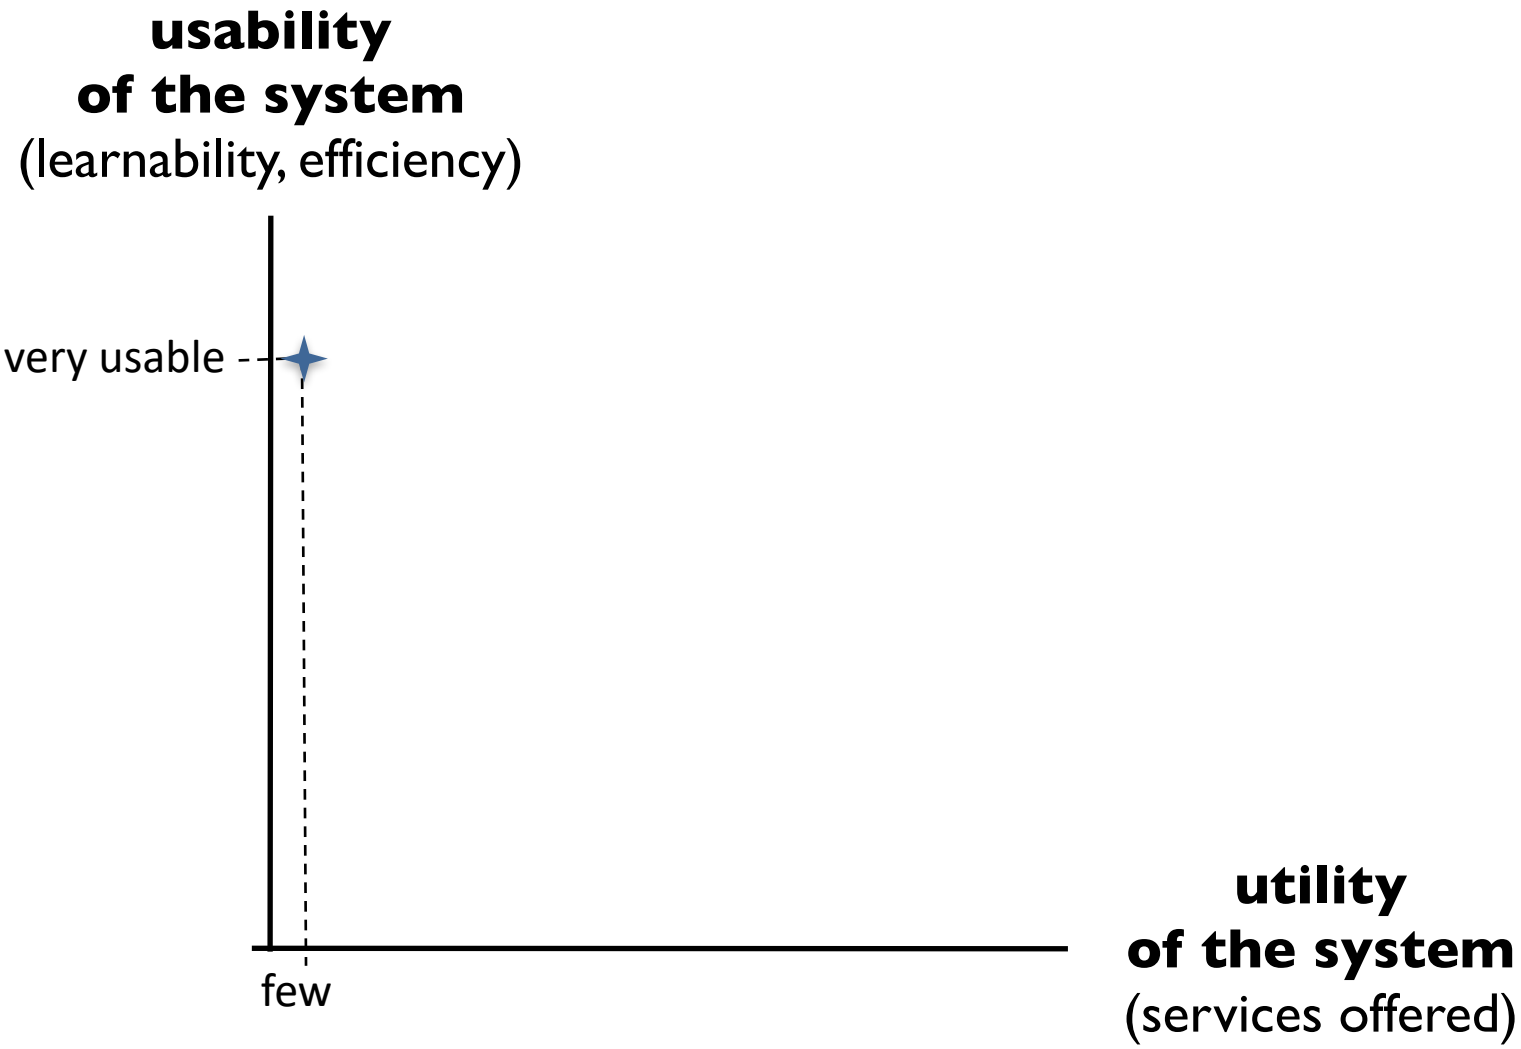

usability
of the system
(learnability, efficiency)

utility
of the system
(services offered)

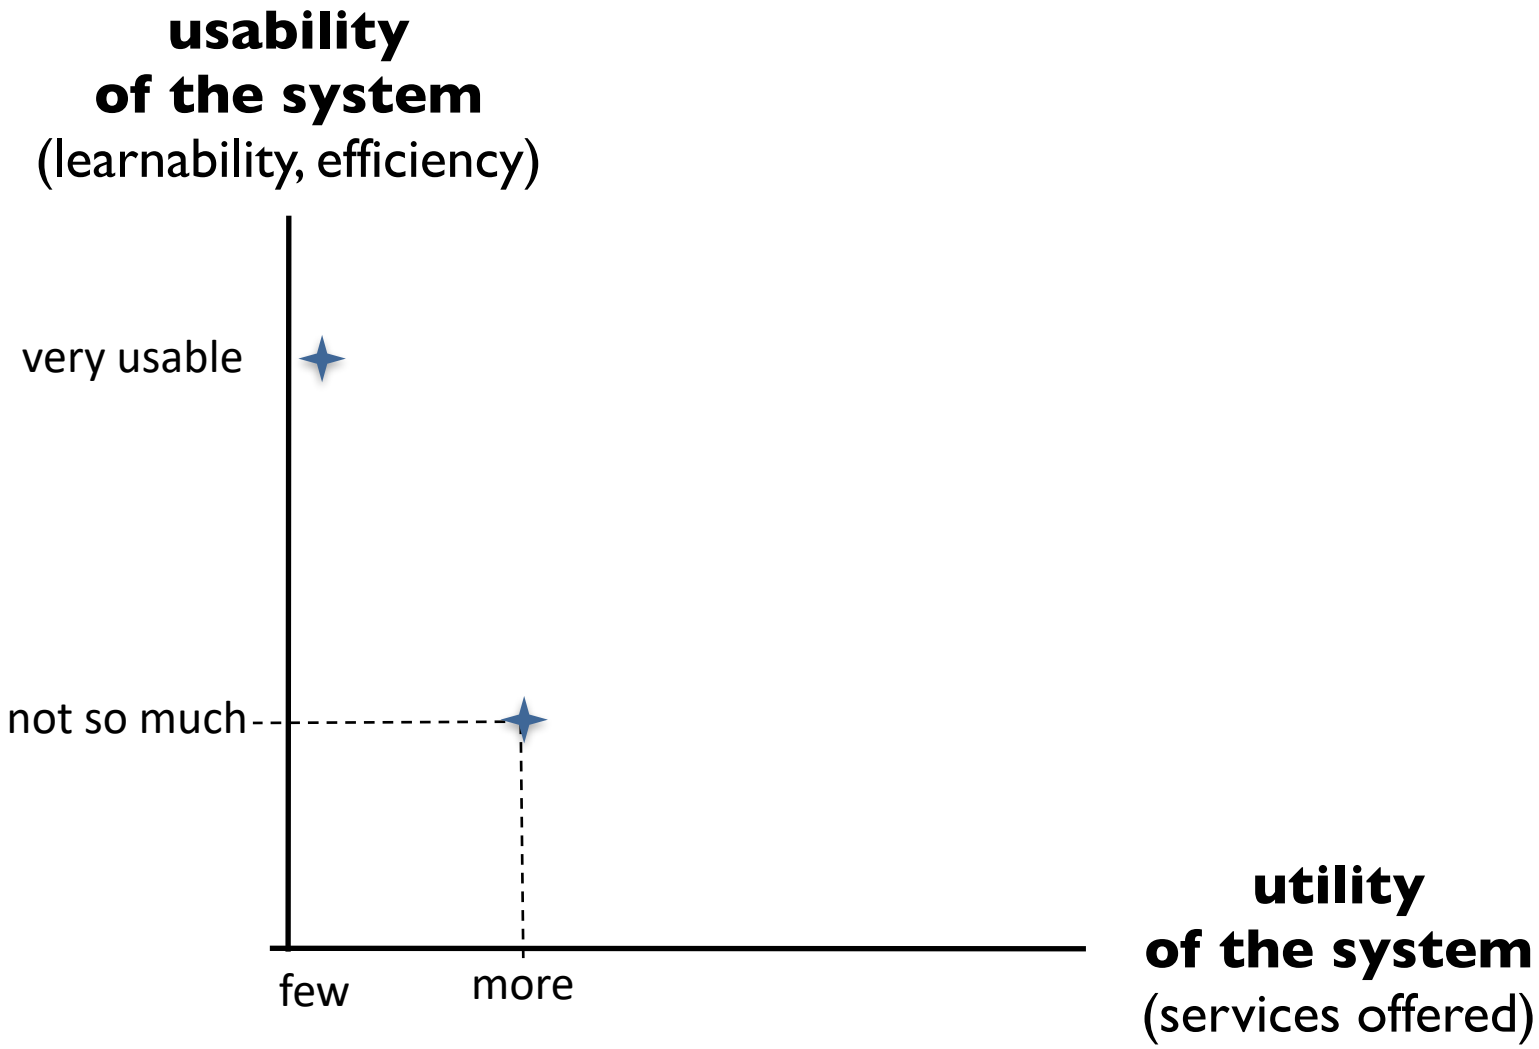

Challenge in designing the HCI

Making it useful and usable is difficult

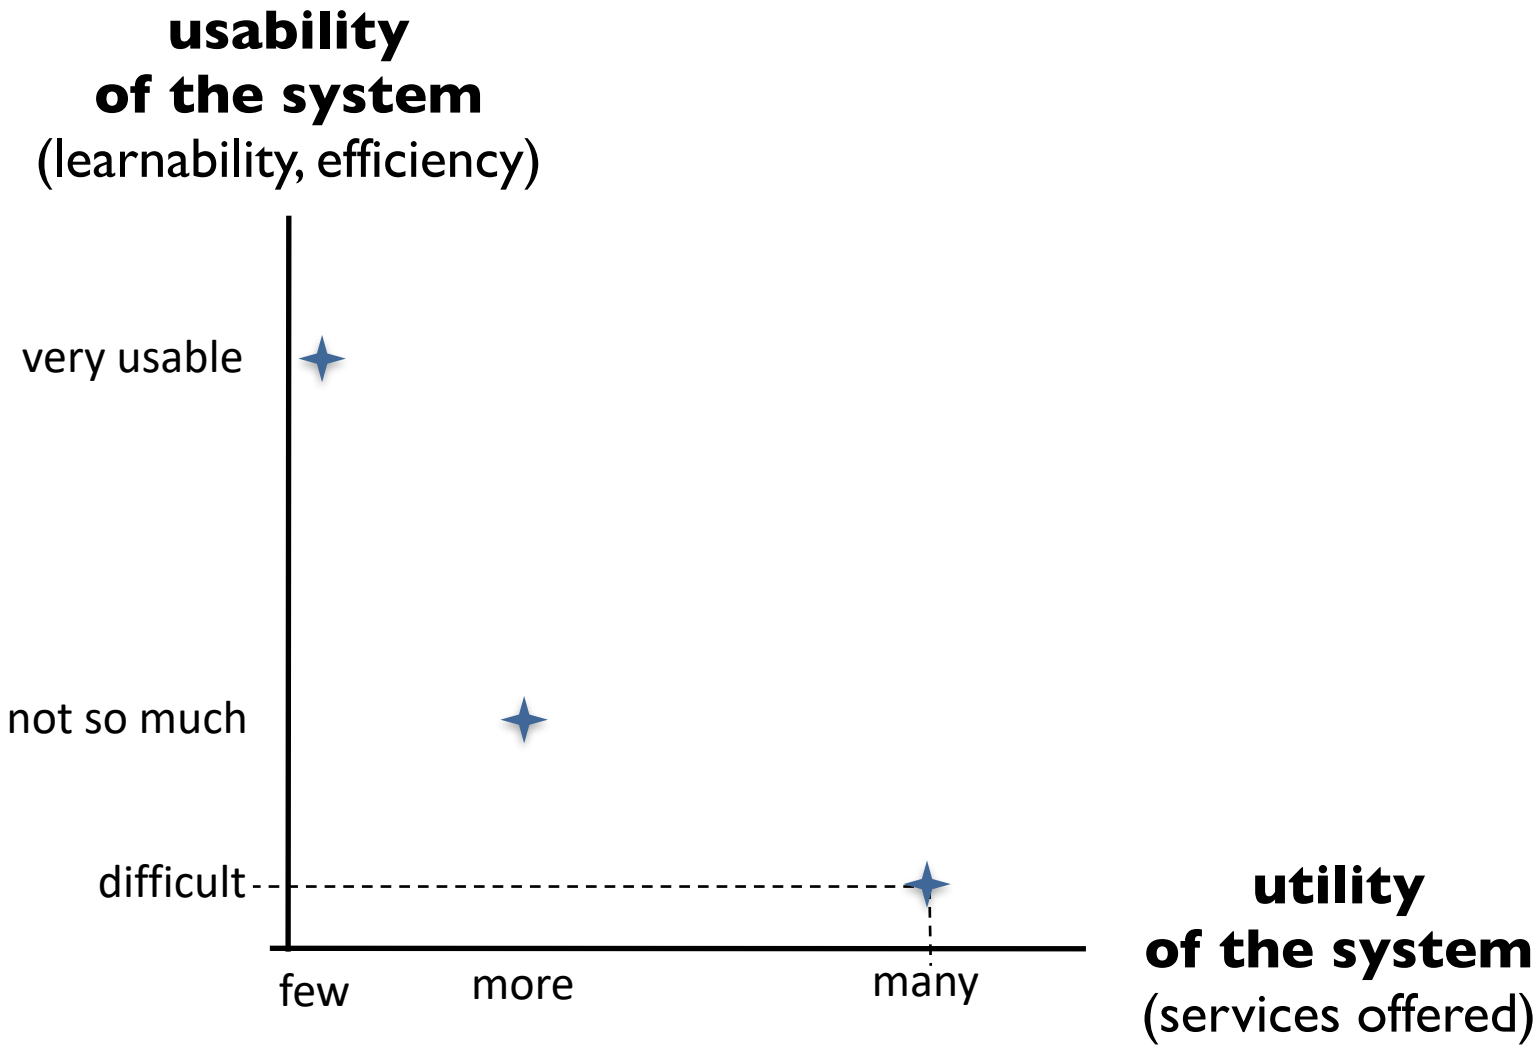

Challenge in designing the HCI

Making it useful and usable is difficult

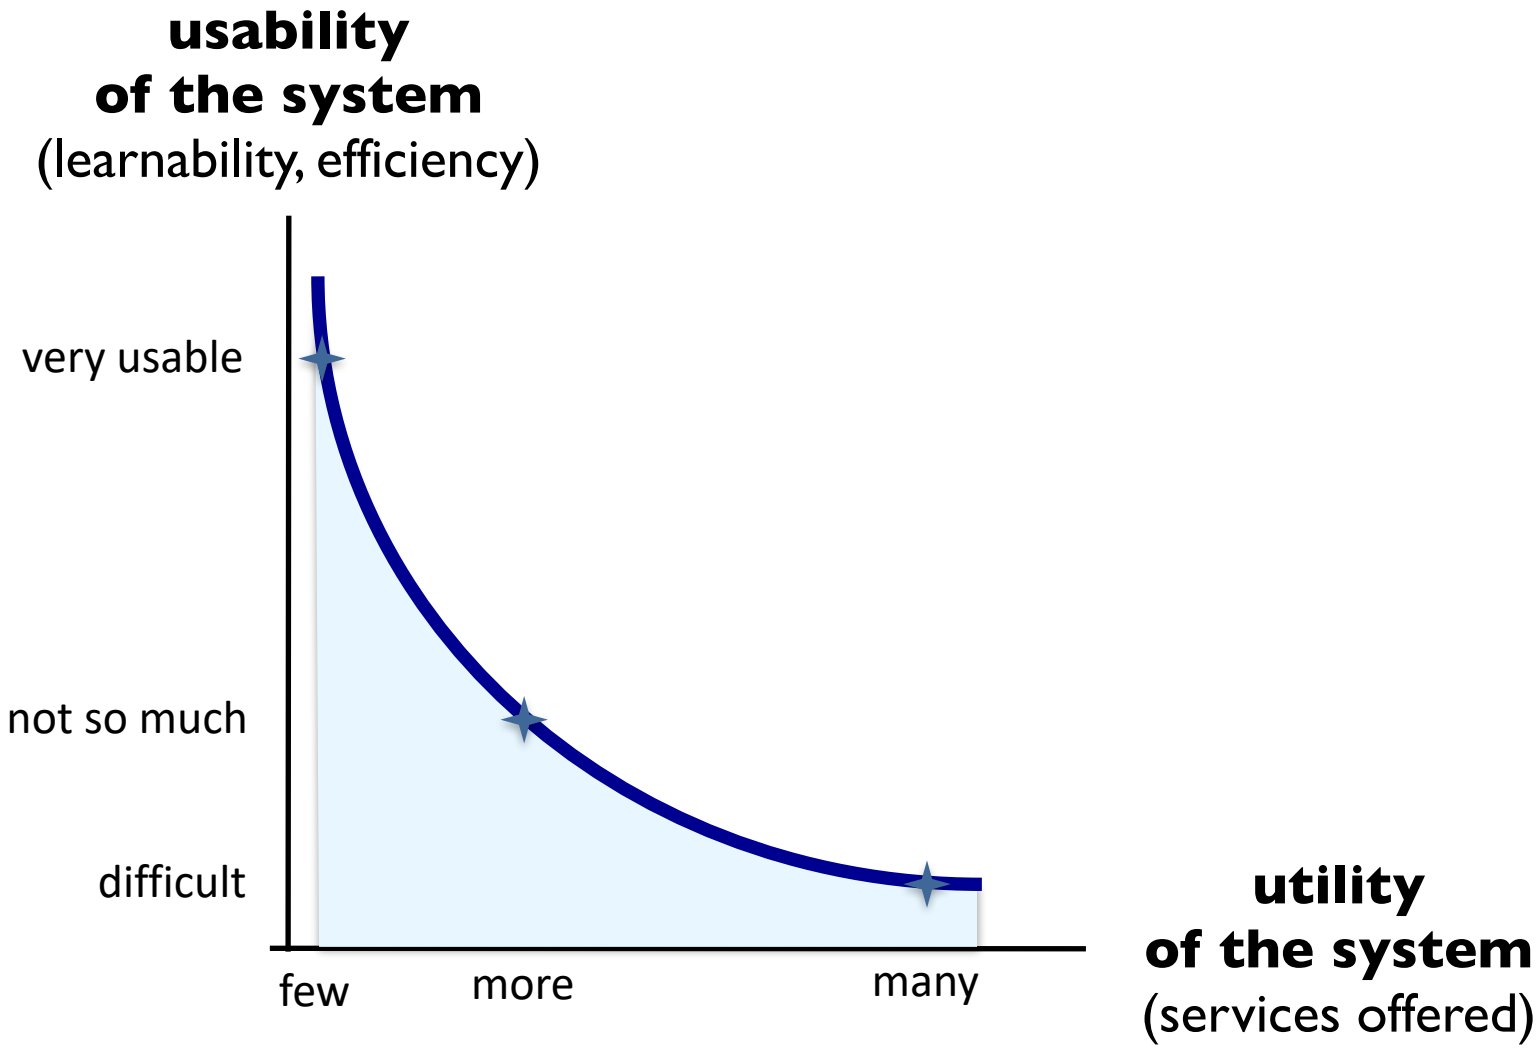

Challenge in designing the HCI

Making it useful and usable is difficult

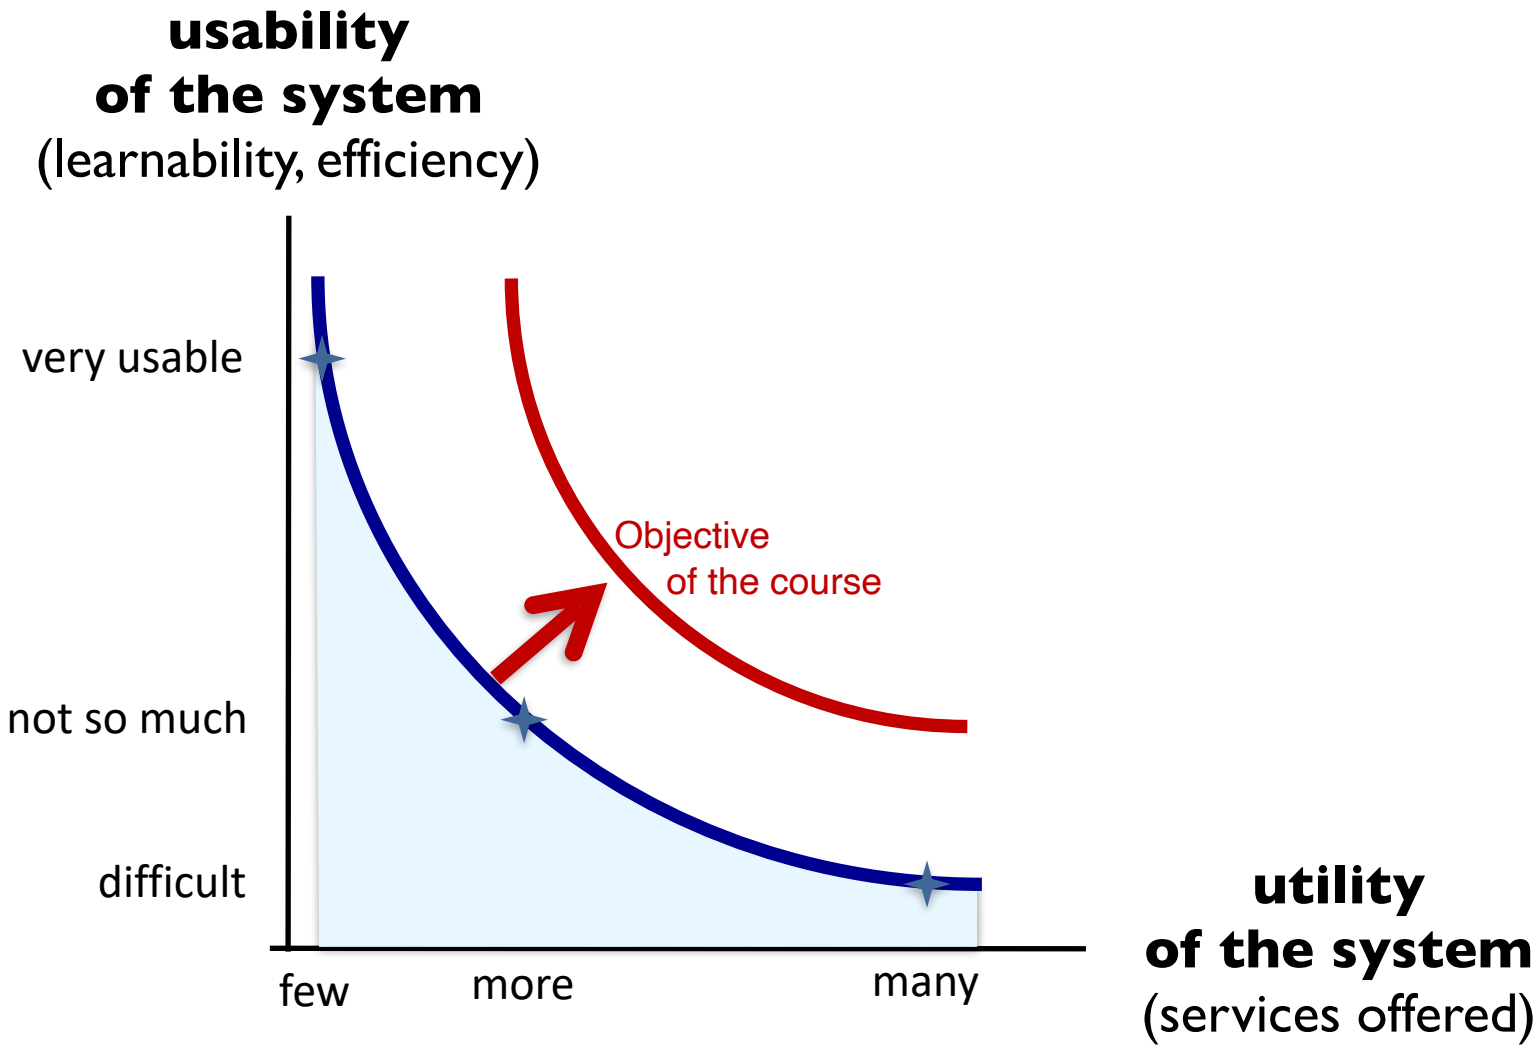

Challenge in designing the HCI

Making it useful and usable is difficult

Challenge in designing the HCI

Making it useful and usable is difficult

In practice

Lectures (12h)

- Fundamental knowledge (on users' behaviour)
- Methodology (on HCI requirements, design, evaluation)

Tutored project (24h)

Analysis, design, prototyping and evaluation of an HCI

- Groups of 3/4 students
- Moderated topics

Evaluation based on the project (no exam)

Integrity and commitment
